PROFILE

Multidisciplinary Systems Engineer & Startup Lead with a proven track record of architecting secure, high-throughput software ecosystems and integrated hardware solutions. Expert at operating at the critical intersection of Artificial Intelligence, Robotics, Systems Engineering, and Health Informatics to solve complex, multi-layered business and technical challenges. Combines deep technical execution with an entrepreneurial, business-first mindset to lead cross-functional engineering teams, mitigate technical debt, and build resilient infrastructure optimized for 99.9% operational uptime. A strategic problem-solver who aligns technology pipelines with high-level corporate goals to optimize resource allocation, accelerate time-to-market, and drive organizational growth.

TECHNICAL &
STRATEGIC SKILLS
MATRIX

Software Engineering
& Core Development

- **Programming Languages:**
Python,
JavaScript,
TypeScript, PHP,
SQL, HTML5,
CSS3
- **Backend Engineering:**
Node.js,
Express.js,
Django, PHP,
REST APIs,
Microservices
Architecture
- **Frontend Technologies:**
React.js,
Responsive Web
Design,
Component
Architecture

Infrastructure, Data &
Automation

- **Database Management:**
PostgreSQL,
MySQL,
Microsoft SQL
Server,
MongoDB
- **DevOps & Deployment:**
Docker, Git,
GitHub, CI/CD
Workflows,

STRATEGIC AREAS OF EXPERTISE

Cross-Functional System Architecture: Designing and deploying scalable, full-stack enterprise solutions that seamlessly bridge web interfaces, microservices, and distributed physical hardware networks.

Intelligent Automation & AI Execution: Building edge-computing architectures, intelligent scripts, and automated workflows that eliminate operational bottlenecks, optimize legacy data pipelines, and reduce overhead costs.

Mission-Critical Infrastructure & Security Compliance: Overseeing high-traffic, multi-platform service delivery with an emphasis on system hardening, vulnerability assessment, proactive load balancing, and secure infrastructure design.

Technical Product Leadership & Startup Operations: Translating high-level business visions into concrete engineering roadmaps, defining hardware schematics, managing agile development cycles, and guiding cross-functional teams toward execution.

Health Informatics & Cyber-Physical Systems: Engineering specialized information systems designed to safely handle sensitive data transmission, telemetric inputs, and integrated robotic hardware workflows.

EMPLOYMENT HISTORY

- Freelance Developer at Upwork, Remote
| Present
Providing freelance development services to international clients, specializing in web development, automation scripts, and data analysis solutions.
 - Python
 - JavaScript
 - React
 - API Integration
- Systems Administrator at Huduma Center Kenya, Eldoret
| Apr 2025 – Sept 2025

Infrastructure
Monitoring

- **Data & Analytics:** Data Science, Data Analysis, Data Wrangling, Pipelines, Process Scripting
- **Workflow Automation:** Custom Enterprise Automation, Automated Business Scripts

Cyber-Physical Systems & Cybersecurity

- **Operating Systems:** Ubuntu, Fedora, Debian Core, Kali Linux, Windows Server Platforms
- **Cybersecurity & Red Teaming:** Penetration Testing, Malware Analysis, Vulnerability Assessment, System Hardening, Network Security, Threat Modeling
- **Hardware & Robotics:** Systems Administration,

Orchestrated the operational equilibrium of public-facing government service systems, managing high-throughput user traffic and multi-platform service delivery. Facilitated robust system availability through proactive load management and secure infrastructure oversight.

- Systems Administration
- Infrastructure Monitoring

○ IT Systems & Website Administrator at Kenya Prisons Service, Nairobi

Jun 2025 – Sept 2025

Engineered and stabilized institutional digital infrastructure, ensuring high availability and mitigating system entropy across mission-critical government platforms. Optimized content delivery protocols and security architectures to maintain a steady-state uptime for sensitive internal systems.

- Systems Administration
- Web Administration
- Infrastructure Reliability
- Security Architecture

EDUCATION

○ Bachelor of Computer Science and Information Technology, The East Africa University

2022-2026

○ Kenya Certificate of Secondary Education (KCSE), Kakamega High School

2018 – 2022

○ Kenya Certificate of Primary Education (KCPE), Kaborom FYM

2010 – 2017

Network
Topology,
Hardware
Integration,
Embedded
Systems Control

Enterprise Leadership & Execution

- **Management Frameworks:**
Agile/Scrum
Methodologies,
Technical
Product
Management,
Startup
Operations
- **Operational Workflows:**
Incident Triage,
Root-Cause
Analysis, Issue
Tracking,
Comprehensive
Technical
Documentation
- **Global Communication**
: English
(Fluent),
Kiswahili
(Fluent), French
(Basic)
